

Case management

blueprint

Dealing with a surgery, a lifelong illness or a cancer diagnosis can be overwhelming. When you're sick, a case manager will advocate for you and help you:

- **Know and use your healthcare coverage**
- **Understand your condition**
- **Navigate the healthcare system**
- **Identify problems that prevent you from getting better**
- **Follow a treatment plan**

Case management is available at no additional cost. Our experienced case managers are here to help you.

Learn more your health plan at
